Schedule for E. Africa trip July 1974

July 18 Arr. Nairobi
8 AM → Hilton
Phoned Rudnai
John Sales (not in)
Jago
Myers
Rudi & Ranji arrive
about 10 AM.

Ms. Rudnai arrives
@ 11 AM. Arrange
to go to Nairobi
Park pm.

4 – 7 pm Visit
Nairobi Park –
Grass very tall since

Rains have been
heavy. Had been
a big die-off of
resident (from 200
to 200) in the park
since the last migration
in + out of the park.
Lions numbers
were high with many
recent litters.
Cheetahs stable at
20-22 animals.

In the evening we
dined with Rachna
and Fred Lee
who runs Safaris.
(Ran FONZ
Kenya safari)

July 19 1974

Had lunch with
Norm Myers. Will be
moving to Ghana
as an FAO employee.

Hired Car & went
back into Nairobi
Park 4 - 7 P.M.

July 20 1974

7 AM - 1 PM Back into
Nairobi Park,
Evening flight to
Entebbe,
met by Linda &
Rangi

who drove me to
Queen Victoria Hotel.
Hotel almost empty
except for people
in bar dancing. Stayed.
overnight.

July 21 1974

Early morning
left Inst for
Lasha in
Lawenzoni Nat'l.
Park.
Most of the country
along the way
was being farmed

with pineapple
manioc, & bspdeally
-bananas.

Had lunch at Hotel
in Moroara,
army town.

~~Left Santarém~~
Entered Rurenopoli
park @ 3PM!

Grass relatively short
with trees interspersed
but sparse.
Saw elephant
almost immediately
in.

As we moved
south we shot

Forest — low
stature, dry,
but we saw
lion + baboon.

Arrived Ishasha
@ 7pm and
stayed at camping
area.

July 22

Went out along
the route to
Lake Edward
flats + back
in the morning
passing through

somewhat forested
area where we
saw small groups
of elephant +
waterbok.

The flats were flat
and muddy ×
game apparently
there to get water.
Hyenas there —
several spread
out as singletons.

Returned to camp
~~the~~ stopping to
look across
Ishasha River.

In the early afternoon
went along
Southern Kigezi
Circuit track
was ~~dusty~~ dry savannah
with occasional
Euphorbia trees.
Swallows in flee.
(Tracker George
took us to spot)

The Lion trees are
marked + the
lions we saw
were part of a
large pride of
~20.

Jon Lood had spent
~ 3-4 mos. studying
Johasha lion
prides:

late afternoon we
went along Johasha
River circuit thru
forested areas -
saw Grant Forest hog.

Moved back onto mixed
savannah, Mom Gnsh
where we'd located
lion, but then
saw later huge
mixed herd of topi
& Kob slowly
moving North

The tops were
standing out in
sections with kob
mainly on ~~patch~~
periphery.

Kob T.G. was
seen with matings.

July 23 -
Drive AM to
Impenatraffe Burneli
forest.
Stayed at Ruhuzi
Guest House.

Located at northern
edge of forest

near Kabale (city).
Thus on way you
pass through many
areas of cleared
forest being cultivated
mainly tea, bananas.

Saw gorillas early
afternoon.
Took afternoon
drive further
into forest. Walked
along path where
forestry people
had planted a long
row of
cypress or juniper.

24 July

Returned to gorilla tracking in very heavy undergrowth.

at 1PM we left Bwindi, & drove thru Kayonza forest (mid-lowland)

through Kabasha & North to Mweya where head-quarters of

Rwenzori park [redacted] to.

- Large safari hotel
  Uganda Institute of
  Ecology + research
  area,

- Briefly met with
  Eric Edroma
  head of U.I.E.
  who had just kicked
  his wife out.

- Left Mweya +
  drove to
  Rudis house
  outside Fort Portal.

  ate dinner at

Fort Portal.

25 July

Rested at R & R
most of day
Met Bill Freeland
who is working on
project —

monkey pathogens —
He is setting goat
up in trees.

In late afternoon
took short walk
into Kibale.

26 July

AM walked along Tom + Rudy's study area; Rudy does his phenology. They have a grid of trails + marked trees that are followed monthly. The forest is relatively open without much undergrowth + an open canopy.

late afternoon walked along logging road - saw many stumps (Forestry people doing selective felling of forest)

27 July

Spent AM in Kibale.

Then drove north to Budongo Forest. Stayed at old brick house built for men ferrying across Lake Albert, but acquired by makerere college for visitors.

House about 5 miles from Rudy study area which was originally study area of Aldrich-Blake

28 July

7:15 — 11 AM

Walked along
Rudy's grid of trails
where he is censusing.
Saw chump briefly but
other signs of their
presence abundant.

In afternoon
drove north to
Kabalega Falls
Natl Park along
Lake Albert Road.
Stopped at Education
Center of Paraa Lodge.
Two tourist groups
present
① U.S. Iowa
mountaineers
② Pan African
Educational Assn

In afternoon
met Fred)?
head of Education
dept.

And Bob
English student of
Eltringham,
working on elephant
reprodn of imbolved
in culling scheme
Only ~ 300 elephants
have been culled
in Kwenzoni &
Kabalega parks
combined)

Student very pro-
Uganda & Amin's
policies although
he thinks am not
so cracked. Not
worried @ British
possibly getting kicked
out.

Main Entrance

Nairobi National Park
July 18 1974
4-~~5~~ PM Sunny
scattered clouds,
~ 60-65° F.

Beginning at East Gate ↓
going out Langata
Gate.

1. Ostrich seen @
4-5 groups ~
singletons. Males
w/ females +
following.
Near Entrance saw
long line of
~ 8 ostrich following
each other up slope.

10? courting female.

4) Rock hyrax

seen in Mokoyeti Gorge.

Group of ~20 sunning on single rock with at least 6 juvs. 2 juv. sit from single mother.

2 others on rock so carpment moved into trees to browse.

Really large group, Animals all piled on each other.

B.B.

3) Jackal

Singleton seen on main road in from East Entrance. Near group of 1 impala, 2 gazelle.

Gazelle kept moving away.

Later before leaving park, pair BBJ seen together.

4) Lion seen @ 6:30 PM on road. ♀ + 2 cubs still w/ spotting ~ 8 (?) mos. old.

Cubs following
behind mother along
road. & short call,
almost continuous.

Big herd of
impala, T. + G.
gazelle, zebra,
wildebeest
& male eland
all seen in proximity.

Two warthogs also
seen in same area.
All ~ 2 miles in
from East Entrance.

One kongoni male
moving together
with Grant's
gazelle.

Single waterbuck
in west end of
Park. ↳ (or South)

3♀ 1♂ reedbuck
in small group.

Single kongoni
male.

3 Giraffe near
gorge with water
+ some forest.

All singly
browsing

23 July 1974

- Drive from Ishasha to Impenetrable (Bwindi) Forest.

- 1 red-tailed monkey (Cercopithecus ascanius) sighted running across road

- > 4 B+W Colobus in tree along road in cultivated / ½ cleared area.

→ Rwahiza Rest House by noon

Gorillas sighted in early AM.

went looking for them with tracker.

2 Gorillas sighted @ 1-2 PM feeding in valley near cultivated (tea, banana) + cleared area, ~~with~~ 2ndary growth.

- were feeding (according to tracks) on vines. Rat.
  grow from clearing.
- (1) Silver back ♂ →
- (2) either ♀ or juvenile
- Between 4:30–6 PM drove along road into forest at SE edge.
- Sighted troop of blue monkeys, single is o late adult ♂ blue, from road.

walked into forest
on track made
by foresters.
Sighted another troop
of blue monkeys
(with adult or) +-
3+ w Colobus
close to one another.
Blue or gave "hack"
call - single call
repeated 5-6 times
at >10 second intervals.

Ranji had stayed on road + sighted another troop of B + W Colobus. Thus all very close together.

We are up 7000—7900 ft. + during SE drive in DP saw considerable stands of bamboo. also lots of tree ferns. With under-growth.

Monkey sightings
are occasionally
in 2nd growth,
least also primary
forest.

8:30 - 11 AM
24 July 1994

Returned to area
where we saw
gorillas + started
tracking them.
No gorillas seen
but.

5 piles of dung
found,
1 of which was
near a [redacted]

- resting place, where tracker said they'd been eating.
- Trackers indicated several gorilla trails thru thick undergrowth
- Next we're apparently used regularly. The thickness of the undergrowth surprising & thick spongy substrate. Thickest parts seem to be mainly
- tree ferns. Were able to hear sounds + movements of animals but

septum impossible because of thickness of underground

@ 9-10 PM on drive to
Kabale -
2 grant cows

25 July 1974

Kabale

- Troop of B+W Colobus as we entered forest ~
- 5:15 PM.

- Two mixed troops of red-tails + blue monkeys seen
- as well as another troop of B+W.

26 July 1974

11 AM - 1 PM

Walked thru forest in Tom's study area. Saw nothing - Too late in morning.

5 - 6:15 PM

Walked along logging road again

Immediately saw troop of red colobus, small blue monkey, red-tailed all

very close with
B+W coloration
cross the road.

(Rudy said that
several big trees
are fruiting in
the area)

later along road
saw large troop
of red colobus
7 20, several
feeding on terminal
branches of
tree with no leaves
probably buds.

On the way back
saw
troop of blue
motorcycles
+ heard fire-trail
07 give 7 "hack"
vocalizations.
Interval 7 10 seconds
between calls.

27 July 1974

7:30 - 8:45 AM

- Walked along road again in Rudy's study area.
- Immediately saw red colobus, l + blues.
- Blue troops are 12-26 in number, in general, smaller troops in more cleared area of forest.
- Red colobus troops get to >30 animals

Heard + saw single mangabey in forest block facing Rudyard's house.

On road to Budongo nothing until we reached turn-off to Makerere college house.

Then troop of baboons ~ 8, with adult ors ~ 3 juvs.

4:45pm

5:30 – ⇒ pm
5 miles along road
onto aldrich Blake
study area.

First came onto
troop of blues,
& red-tailed.

Blues ~~were~~ 7-8 annual
Red-tails: no count
possible.

On way back
walking along
road saw
mitis X Os canaan

hybrid setting in
crotch of tree.
Color like blue
monkey but
nose white +
dark rules to cheek.

Budongo is a more
open canopied
forest than
Kibale with
not much

undergrowth.
Present are
vervets, baboons.
chimps, red-tails
blues — B+W Colobus

No mangabeys or
red colobus as
in Kibale.

On drive back
single red-tail
seen cutting in
tree over road.

28 July 1974

---

30 July 1974

Drive Paraa Lodge to Murchison Falls.
Then to

Masindi → Kampala.

~~Kap~~ ~~Afolo Towers~~

While driving from
park
saw several elephant
herds,
one @ 40-50
Animals 2 others
Smaller 6-8
animals.

One all male apt
group numbering
~~Single yng~~ 13 or 15.
~~rec'd~~ crossed road.
~~Could not get flight~~
Spent evening
at Bruno + Eva's
round argueer.
with Norwegian

Turin in Uganda.

Missed Entebbe → London flight Cancelled.

Spent night in Entebbe airport

31 July 1976

AM → Nairobi

Day in Nairobi
